

BIOFUELS & BIOENERGY

BIO-ETHANOL • BIO-REFINERIES • BIO-JET FUEL • BIO-MASS •
BIO-DIGESTION • BIO-DIESEL • RENEWABLE CHEMICALS • DROP IN FUELS

OUR CORE SERVICES

Feasibility studies, technology
evaluation and integration

Master planning and
regulatory approvals

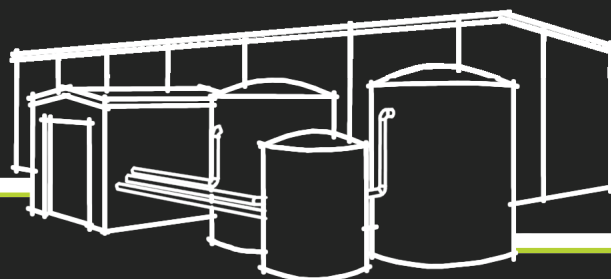

Front end engineering
and budget preparation

Detailed design and
procurement coordination

CREATE • PLAN • DELIVER

BIOFUELS & BIOENERGY

LEADERS

TfA are one of Australia's most experienced engineering consultancies in the Biofuels industry. We performed the feasibility and detailed design for the Dalby Biorefinery, the first greenfield grain to ethanol plant in Australia.

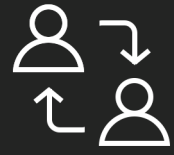

SPECIALISTS

Over 17 years in the Biofuels industry. We have assisted with numerous biofuels projects, presented at Australian ethanol conferences and are as passionate about biofuels as you are.

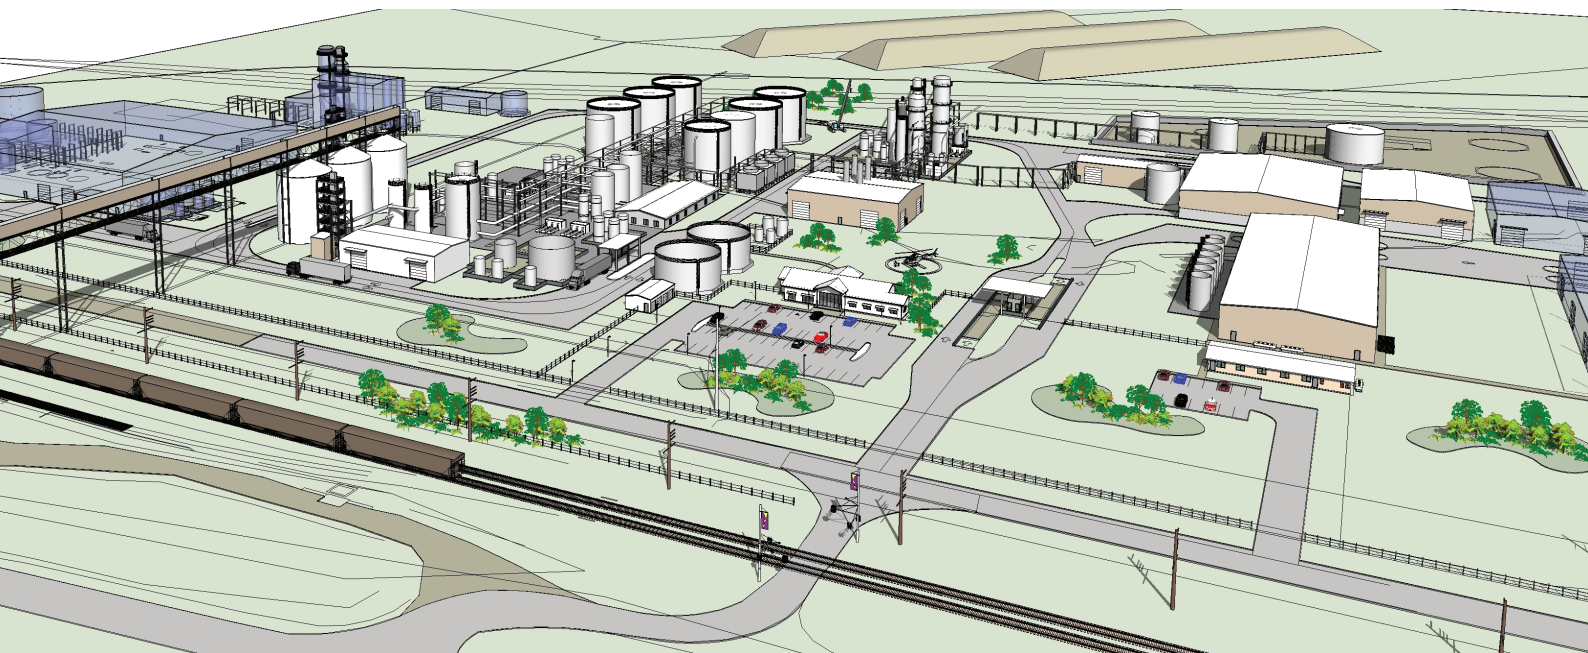

INTERNATIONAL EXPERIENCE

TfA have worked with a variety of international technologists, toured biofuels and biomass plants and attended bioenergy conferences throughout the USA and Europe.

COLLABORATIVE

We will work with you to expedite your project, manage approvals and specialist technologists, develop project budgets and provide local design to produce a cost effective, cohesive plant that you can depend on.
